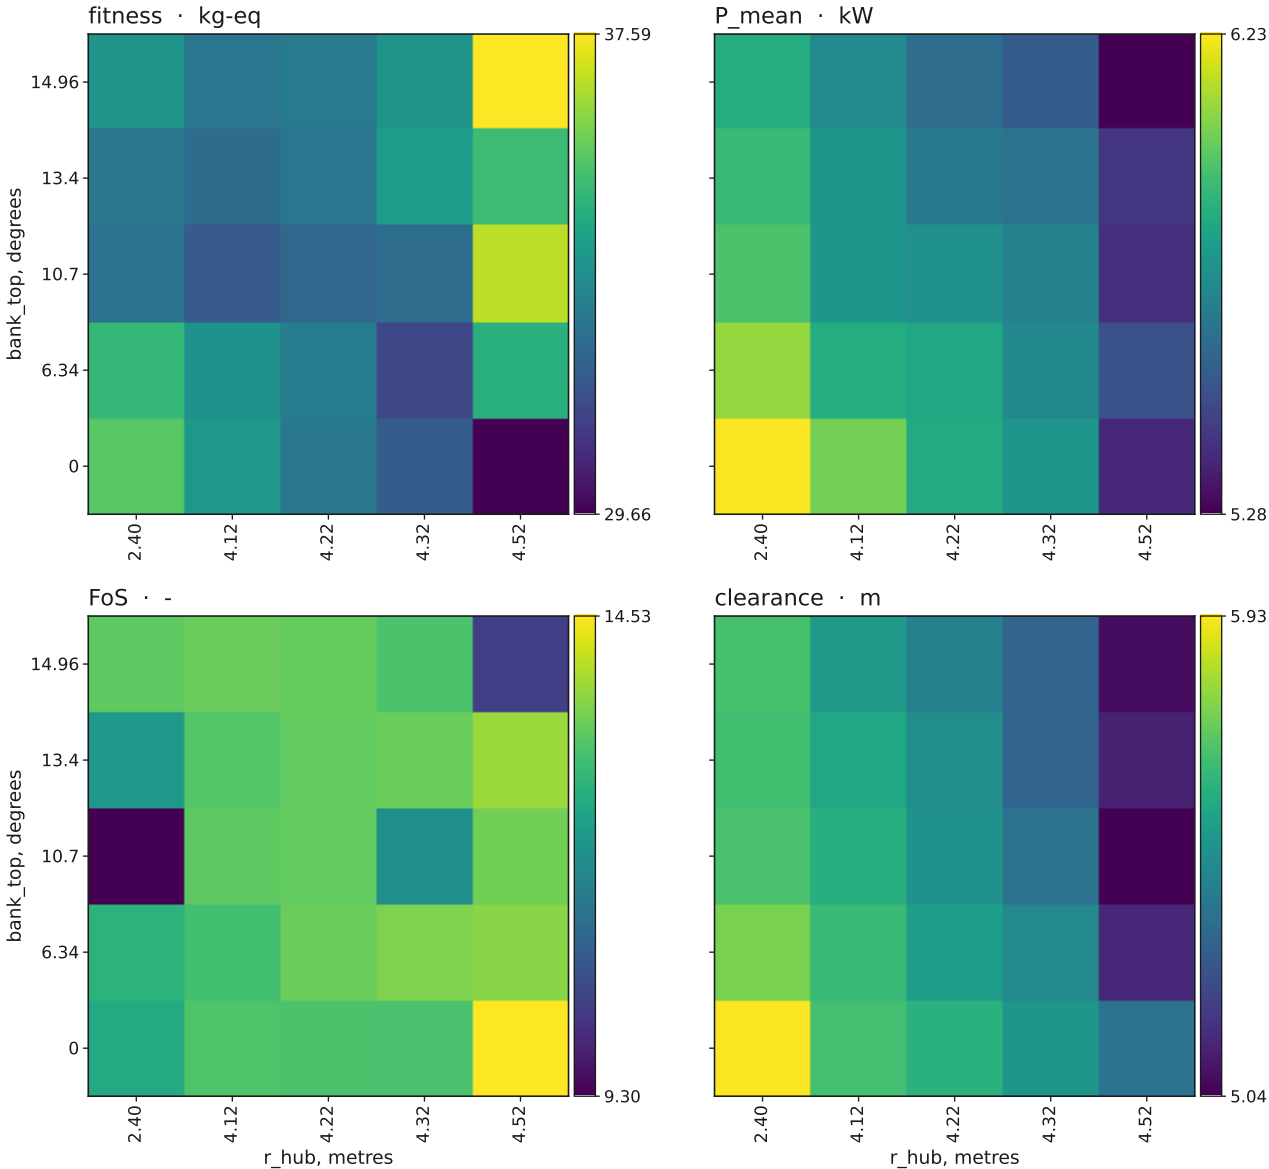
Figure 10 What the platform draws

Plate A · four outcomes on one gene pair · 508 ok designs · one colourbar per panel



Every panel reads the 508 designs that cleared every gate. FoS, clearance and P_mean carry floors in the caption.

data dd3cc6a · run a76c5e9 · era post-95c385d_wind-authority · rows NR-078 to NR-082 · script 4fb3a8e

colour is the cell median of the outcome, never the mean. Bar limits are the smallest and largest cell medians, rounded outward to 2 dp.
